LOS ANGELES

BZIPPY can accommodate a wide range of custom projects. The studio is happy to work with you on your custom project needs or estimates via email. Past custom projects include: custom lamp bases, custom tiles, custom painted vessels, and custom shaped furniture pieces.

Custom projects are assessed individually based on the project needs in regard to quantity, timeline and our studio's capacity. Once we evaluate our studio capabilities in relation to your project, we will contact you with a proposed budget and timeline. We can also provide professional renderings for custom projects.
